

Ideation Phase

Define the Problem Statements

Date	31 May 2025
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	(Describe customer who is facing the problem)	Describe the customer and their attributes here
I'm trying to	(List their outcome or "job" they are trying to achieve)	List the thing they are trying to achieve here
but	(Describe what problems or barriers stand in the way of their goal)	Describe the problems or barriers that get in the way here
because	(Enter the "root cause" of why the problem or barrier exists - what needs to be solved?)	Describe the reason the problems or barriers exist
which makes me feel	(Describe the emotions from the customer's point of view - how does it impact them emotionally?)	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	but it takes a long time	because The website is not responsive and doesn't have a mobile version	which makes me feel Frustrated
------------------------	---	---------------------------------	--	---------------------------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An employee requesting network services	Request a new network service or connectivity quickly	The request process is manual and takes too much time	Multiple approvals, manual assignments and lack of automation	Delayed and frustrated
PS-2	A network administrator	Manage and track network requests efficiently	There is no centralized tracking and automatic assignment	Requests are handled manually and updates are not real-time	Overwhelmed and inefficient
